SUBJECT INDEX

Absorption of water into the starch granule, a small-angle X-ray scattering study of the, 225
Acinetobacter calcoaceticus NCTC 10305, synthesis of a core constituent of the lipopolysaccharide from, 69
Allyl *O*-[sodium(α-D-*glycero*-D-*talo*-2-octulopyranosyl)onate]-(2 → 6)-2-acetamido-2-deoxy-β-D-glucopyranoside, synthesis of, 69
Amino acids, essential, involved in glucan-dependent aggregation of *Streptococcus sobrinus*, 137
Anhydro sugars in aqueous solution, calculation of the optical rotation of some, 191
1,5-Anhydroxylitol and 1,5-anhydro-D-arabinitol 2,3,4-tris(phosphates) synthesis of, 187
Antileukemic activity and synthesis of certain D-fucopyranosyl nucleosides, 285
Apple and sugar-beet pectins extracted by chelating agents, structure and properties of, 99

Branched sugars, use of silylmethylene radical cyclization for the stereoselective synthesis of, 247

Calculation of the optical rotation of some anhydro sugars in aqueous solution, 191
Capsular polysaccharide of *Kelbsiella* SK1–structure, and location of *O*-acetyl substituents by NMR and MS, 325
Carbohydrate–protein linkage region common to several mammalian proteoglycans, total synthesis, 295
Cell walls of *Eupenicillium crustaceum*, structure and conformational features of an alkali- and water-soluble galactofuranan from the, 361
Chemical–enzymatic synthesis of a sialyl-Le^X-containing hexasaccharide found on O-linked glycoproteins, use of the "Core-II" *N*-acetylglucosaminyltransferase in the, 149
Complexes of cobalt(II) and glucosamine. Applications of molecular mechanisms and NMR spectroscopy, structures of, 1
Conformational analysis of 3-deoxy-3-*C*-(hydroxymethyl)-1,2;5,6-di-*O*-isopropylidene-α-D-allofuranose, NMR spectroscopy and, 49
1,2-*O*-(1-Cyanobenzylidene) derivatives, influence of glycosyl-donor structure and promoter on glycosylation by sugar, 85
Cyclization via silylmethylene radical, use for the synthesis of branched sugars of, 247

3-Deoxy-3-*C*-(hydroxymethyl)-1,2;5,6-di-*O*-isopropylidene-α-D-allofuranose, NMR spectroscopy and conformational analysis of, 49
Dermatan sulfate, comparison of the activity of two chondroitin AC lyases on, 369
Disaccharides, electrosyntheses from phenyl or ethyl 1-thioglycosides, 237

Electrosyntheses of disaccharides from phenyl or ethyl 1-thioglycosides, 237
Eupenicillium crustaceum, structure and conformational features of an alkali- and water-soluble galactofuranan from the cell walls of, 361

FABMS/derivatisation strategies for the analysis of heparin-derived oligosaccharides, 205
Fructose, pyrolysis of inulin, glucose, and, 341
D-Fucopyranosyl nucleosides, synthesis and antileukemic activity of certain, 285

Galactofuranan from cell walls of *Eupenicillium crustaceum*, structure and conformational features of an alkali- and water-soluble, 361
β-D-Galactosidase from *Bacillus circulans*, convenient synthesis of β-D-galactosyl disaccharide derivatives by the, 315
β-D-Galactosyl disaccharide derivatives by the β-D-galactosidase from *Bacillus circulans*, convenient synthesis of, 315

(1 → 3)-β-D-Glucan-dependent activation of a limulus coagulation factor G, inhibition by laminaran oligosaccharides and degradation products of, 115
Glucan-dependent aggregation of *Streptococcus sobrinus*, essential amino acids involved in, 137
Glucans: a mechanistic study, pyrolysis of some ^{13}C-labeled, 27
β-D-Glucopyranosyl-benzene and β-D-mannopyranosyl-benzene, crystal studies, 197
Glucosamine. Applications of molecular mechanisms and NMR spectroscopy, structures of complexes of cobalt(II) and, 1
Glucose, and fructose, pyrolysis of inulin, 341
Glycosylation by sugar 1,2-*O*-(1-cyanobenzylidene) derivatives, influence of glycosyl-donor structure and promoter, 85
2-*C*-Glycosyl compounds by reaction of 1,2-anhydro sugars with organocuprate reagents, 275

Heparin-derived oligosaccharides, FABMS/derivatisation strategies for the analysis of, 205

Inulin, glucose, and fructose, pyrolysis of, 341

Klebsiella SK1 capsular polysaccharide–structure, and location *O*-acetyl substituents by NMR and MS, 325

^{13}C-Labeled glucans: a mechanistic study, pyrolysis of some, 27
Laminaran oligosaccharides and degradation products, inhibition of high mol wt (1 → 3)-β-D-glucan-dependent activation of a limulus coagulation factor G by, 115
Levansucrase immobilization on calcium phosphate gel, 129
Limulus coagulation factor G, inhibition of high mol wt (1 → 3)-β-D-glucan-dependent activation by laminaran oligosaccharides and degradation products of, 115
Linkage region common to several mammalian proteoglycans, total synthesis of the carbohydrate–protein, 295
Lipopolysaccharide from *Acinetobacter calcoaceticus* NCTC 10305, synthesis of a core constituent of, 69
Lyases, two chondroitin AC, comparison of the activity of on dermatan sulfate, 369

Medicagenic acid saponins on plant pathogens: modification of the saccharide moiety and 23a substitution, synthesis and antifungal activity of, 161

NMR spectroscopy and conformational analysis of 3-deoxy-3-*C*-(hydroxymethyl)-1,2;5,6-di-*O*-isopropylidene-α-D-all ofuranose, 49
Nucleosides, synthesis and antileukemic activity of certain D-fucopyranosyl, 285

Oligosaccharides derived from heparin, FAB-MS/derivatisation strategies for analysis, 205
Oligosaccharides having the β-D-Glc*p*NAc-(1 → 4)-D-Glc- structure, syntheses of, 171
Optical rotation of some anhydro sugars in aqueous solution, calculation of the, 191
Organocuprate reagents, reaction with 1,2-anhydro sugars and synthesis of 2-*C*-glycosyl compounds, 275

Pectins extracted by chelating agents, structure and properties of apple and sugar-beet, 99
Polymerase activity of bound levansucrase, 129
Polysaccharide, capsular, of *Klebsiella* SK1–structure, and location of *O*-acetyl substituents by NMR and MS, 325
Polysaccharide of *Shigella dysenteriae* type 1, O-specific, synthesis of a corresponding tetrasaccharide donor, 259
Potassium chromate, reduction of by D-fructose, D-galactose, D-mannose, D-glucose and L-sorbose, 15
Proteoglycans, total synthesis of the carbohydrate–protein linkage region common to several mammalian, 295
Pyrimidin-nucleoside analogs, crystal studies of β-D-glucopyranosyl and β-D-mannopyranosyl benzene, 197
Pyrolysis of inulin, glucose, and fructose, 341
Pyrolysis of some ^{13}C-labeled glucans: a mechanistic study, 27

Reduction of potassium chromate by D-fructose, D-galactose, D-mannose, D-glucose and L-sorbose, 15

Saponins on plant pathogens: modification of the saccharide moiety and 23a substitution, synthesis and antifungal activity of medicagenic acid, 161
Shigella dysenteriae type 1, synthesis of a tetrasaccharide donor corresponding to the O-specific polysaccharide of, 259
Sialic acid analogue, a convenient method for the introduction of nitrogen and sulfur at C-4 on, 181
Sialyl-Le^{x}-containing hexasaccharide found on O-linked glycoproteins, use of the "Core-II" *N*-acetylglucosaminyltransferase in the chemical–enzymatic synthesis of a, 149

Silylmethylene radical cyclization, use for a selective synthesis of branched sugars of, 247
Starch granule, a small-angle X-ray scattering study of the absorption of water into the, 225
Streptococcus sobrinus, essential amino acids involved in glucan-dependent aggregation of, 137
Structures of complexes of cobalt(II) and glucosamine. Applications of molecular mechanisms and NMR spectroscopy, 1
Sugar 1,2-*O*-(1-cyanobenzylidene) derivatives, influence of glycosyl-donor structure and promoter on glycosylation by, 85
Sugar-beet and apple pectins extracted by chelating agents, structure and properties.of, 99
Syntheses of oligosaccharides having the β-D-Glc*p*NAc-(1 → 4)-D-Glc- structure, 171
Synthesis and antifungal activity of medicagenic acid saponins on plant pathogens: modification of the saccharide moiety and 23a substitution, 161
Synthesis and antileukemic activity of certain D-fucopyranosyl nucleosides, 285
Synthesis of β-D-galactosyl disaccharide derivatives by the β-D-galactosidase from *Bacillus circulans*, convenient, 315

Tetrasaccharide donor corresponding to the O-specific polysaccharide of *Shigella dysenteriae* type 1, synthesis, 259
1-Thioglycosides, electrosyntheses of disaccharides from phenyl or ethyl, 237
Tris(phosphates), synthesis of 1,5-anhydroxylitol and 1,5-anhydro-D-arabinitol 2,3,4-, 187

Use of the "Core-II" *N*-acetylglucosaminyltransferase in the chemical–enzymatic synthesis of a sialyl-Le^X-containing hexasaccharide found on O-linked glycoproteins, 149

X-ray scattering study of the absorption of water into the starch granule, a small-angle, 225
Xylitol and 1,5-anhydro-D-anhydro-D-arabinitol 2,3,4-tris(phosphates), synthesis of 1,5-anhydro-, 187
